Aspiring Software Developer with over 7 years of professional experience, transitioning into tech with a strong foundation in React, Node.js, and modern web technologies. Adept at building user-focused applications, thriving in collaborative team environments, and driven by continuous learning. Eager to contribute to a dynamic development team where I can make an immediate impact while growing my technical expertise.

Technical Skills

Languages: JavaScript (ES6+), TypeScript

Frameworks / Libraries / Tools: React, Node.js, Express, Vite

Frontend Development: HTML, CSS, TailwindCSS, Material UI, Shadchan

APIs: RESTful APIs

Databases: SQLite, MongoDB

Experience

Generation Thailand

Bangkok, TH

Full Stack Developer

Feb 2025 - May 2025

- **Built two full-stack web applications** [All rice inc.](#) (3+ majors feature such as ChatBot, Add to cart, Filtering Products, etc), [Spacecraft Store](#) (Solo during the camp) **using React, Node.js, Express, and MongoDB** in a fast-paced, project-based program.
- **Led** development efforts and **facilitated** agile processes (acting as Scrum Master/Project Owner) within a **5-person** team for a significant e-commerce project, contributing to improved team coordination and on-time task completion.
- **Served as Cohort Leader for 34 peers**, facilitating communication with instructors/staff and **organizing ~5 technical review sessions** that enhanced understanding of core concepts (e.g. JavaScript, React State).
- **Demonstrated** strong problem-solving abilities by consistently solving **20+ daily coding challenges** (algorithms, data structures) **while proactively learning 3 additional languages** (TypeScript, Go, Java).
- **Assisted a fellow bootcamp team by contributing to both front-end and back-end (deployed website) development for critical features** (registration, login, product list/detail), ensuring they successfully met their project timeline.

Grab Thailand

Bangkok, TH

Thailand Feed Content Owner

Jan 2019 - Apr 2022

- **Identified workflow inefficiencies** in manual content publishing **and collaborated with the development team** by clearly defining requirements and quantifying impact, leading to the **successful implementation of automated content scheduling and a ~15% increase in operational efficiency.**
- **Managed** an awareness campaign using an **agile-like iterative process**, including planning, daily updates (similar to stand-ups), continuous monitoring, and post-campaign analysis with documented lessons learned, resulting in a **~35% user visit increase in 3 months** and **contributing to ~฿10M annual partner revenue.**
- **Collaborated effectively with 4+ diverse regional teams (Product, Marketing, Ads, Design)**, translating varied stakeholder requirements into aligned content strategies and fostering cross-regional knowledge sharing – mirroring communication dynamics within software development teams.
- **Ensured content quality and 100% guideline adherence thorough 'Guardian' reviews**, demonstrating strong attention to detail, analyzed performance data to drive data-informed content improvements, **achieving a ~3-8% avg. application CTR increase.**
- **Synthesized** best practices and performance data into clear training materials. **Developed** and confidently **presented** training solo to **30+** team members, including senior leadership (Marketing Head/Current CEO), demonstrating effective communication of complex information.

Certificates

Full Stack Junior Software Developer Program (Generation Thailand, expected 22 May 2025), [Foundations of Project Management](#) (Google/Coursera), [...more certificates](#)

Education

Srinakharinwirot University
Marketing, 2011 - 2015

Bangkok, TH
